

MARINEDECK 2000[®] INTERIOR natural durability and comfort

MARINEDECK2000[®] INTERIOR technology

Being made of carefully selected cork granules and to utilize all of the advantages and properties of cork, a high-end hybrid synthetic binder was developed. Production facilities employ integrated and continuous volume/weight control, special tools, and high pressure machinery to create the required density and all in accordance to ISO 9002.

Cork granules are excellent thermal insulators and can reduce heat loss by 36% or lower temps by 53%. The use of cork in protective heat shields of the space shuttle is one of the most exciting cork applications.

MARINEDECK2000[®] INTERIOR in each kind of room

Interior rooms aboard ships need to reflect the feelings of the owner. Besides a floor needs to provide a quality image. MARINEDECK2000[®] INTERIOR also is the perfect answer in heavy traffic areas.

The natural benefits of composite cork flooring

The composition of MARINEDECK2000[®] INTERIOR and the natural benefits of the cork reduce the jarring effect on the feet, leg and backbone. This important benefit makes life more comfortable for anyone who walks, works or sports on it.

A standard to keep up appearances

Any environment needs to be cleaned. MARINEDECK2000[®] INTERIOR is easy to clean either with a vacuum cleaner or a brush and occasionally with a mop. Cleaning advises are to be obtained from our web site www.stazo.nl.

MARINEDECK 2000[®]

Easy installation

Of course there is a strong sense of constructional heritage in ships. MARINEDECK2000[®] INTERIOR looks very attractive and is very easy to apply. The installation manual is available from our web site www.stazo.nl.

MARINEDECK2000[®] INTERIOR in wet environments

Provided MARINEDECK2000[®] INTERIOR floors are sealed against the walls, there would not be any objection to use MARINEDECK2000[®] INTERIOR in bathrooms, kitchens, toilets, and so on. MARINEDECK2000[®] INTERIOR is completely high pressure steam water closed.

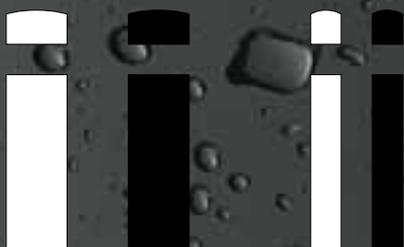

MARINEDECK2000[®] INTERIOR top coat

An antistatic finish makes dirt easy to remove and avoids dust from accumulation. The prescribed top coat is specifically developed for MARINEDECK2000[®] INTERIOR. The coating meets the highest demands for interior marine floors. Technical data sheets are available from our web site www.stazo.nl.

Two standard colours of marine strips

To obtain a real marine look, marine strips are specifically designed for MARINEDECK2000[®] INTERIOR. These strips are available in black and in white and in 4 mm (1/6") and in 8 mm (1/3") and can be coated with the prescribed top coat too.

Deciding advantages of MARINEDECK2000[®] INTERIOR

- Excellent thermal properties
- Fluid compatible
- High load resistance
- Extreme low maintenance
- Wear and shock resistance
- Pet nail resistance
- Non flame supportive/flame distinguishing
- High durability performance
- Excellent (sea)water resistance
- Easy installation
- All climat resistance
- Substantial reduction of vibrations like contact noise
- Excellent thermal properties
